AI THIS MONTH

Gemini’s new small-business hub

Google added it to the Gemini app on 20 October. What it does, and what to check first.

Swipe for more

1

Your brand style, saved

Upload your website, brand kit, fonts or colours once. Gemini reuses them when it makes images.

2

Finance charts

It turns spreadsheets, receipts and purchase records into charts and interactive models.

3

Connected apps

Xero, Shopify, Canva, Google Business Profile and more. Third-party apps handle your data under their own privacy policies.

4

Which account are you on?

Personal account: Google says human reviewers read some data. Workspace account: not reviewed by people or used for training without permission.

5

Three checks

Use your Workspace account. On a personal one, turn off Keep activity. Connect one app at a time.

Try the brand style first

It has the least to lose. The full piece: AI This Month from Just AI Talking.
